

Christopher J. Long, MD is a pediatric urologist who specializes in hypospadias, neurogenic bladder, minimally invasive surgery, and urologic oncology at the Children's Hospital of Philadelphia, USA. He has done extensive work to standardize hypospadias surgical documentation at CHOP and improved their ability to detect surgical outcomes and incorporate patient reported outcomes. He is a vice-chair of the Society for Pediatric Urology Hypospadias Taskforce and a board member of the Hypospadias International Society. He is the program director for the residency program and co-program director for the fellowship program at CHOP.
